Providence Nurses:

Supporting Health for a Better World

May 2021

Objectives

By the end of this session the learner will be able to:

1. Recognize the six Tenets that will advance the practice of Nursing at Providence
2. Identify future nursing specific clinical inquiries to advance the practice of nursing at Providence

Striving to Make Every Encounter Sacred

With every life we touch, we affect more than one individual, strengthening our communities and making the future brighter. Our work creates a better, healthier world for all people, especially those who are poor and vulnerable.

UNITY

We care for each other just as we do for our patients. Providence strives to create fulfilling work environments that make every nurse feel valued, heard and included.

GROWTH

We are committed to empowering your calling as a nurse. We offer fellowships and residency for all with everyday support on the most advanced technology and resources.

SACRED ENCOUNTERS

Nurses at Providence are leaders who transform every encounter into a sacred relationship. We see your value, help you transform care and strive to amplify your impact.

A FOCUSED PATH LEADING TO A CLEAR VISION

Fellowships and Residencies for All

We believe that all nurses should have access to a residency program when transitioning into practice and to a fellowship program when transitioning into specialty. We offer an accredited evidence-based residency program to all newly graduated nurses who choose to practice at Providence.

Professional Development

As nurses we understand the importance of life-long learning and encourage continuous professional development. We support you in each stage of your career, from residency or practice to specialty or fellowship to management and leadership roles. [Explore development opportunities.](#)

Advanced Practice

Advanced practice is vital to our mission of Health for a Better World. At Providence, we value the contributions of advanced practice registered nurses, nurse midwives, certified registered nurse anesthetists, clinical nurse specialists and physician assistants.

A FOCUSED PATH LEADING TO A CLEAR VISION

Compassionate Care

Providence nurses strive to make every encounter sacred. We approach every interaction with compassion, taking the time to know our patients and easing their way through the healing process.

Engagement

We believe that all nurses should have an opportunity to influence their practice. We support and promote a shared leadership structure that gives nurses a voice on their practice.

Inclusive Care

We are an inclusive workforce that champions diversity of thought, experience, culture and beliefs. We cherish our core values of compassion, dignity, justice and integrity. For example, bullying is a pervasive issue that has been observed in nursing schools and in practice settings. It is destructive to nurses and organizations. At Providence, we do not tolerate bullying behaviors, condescending attitudes, destructive resentments or backstabbing.
