Ambulatory Blood Pressure Monitoring

Providence Scholls Primary Care

Introduction

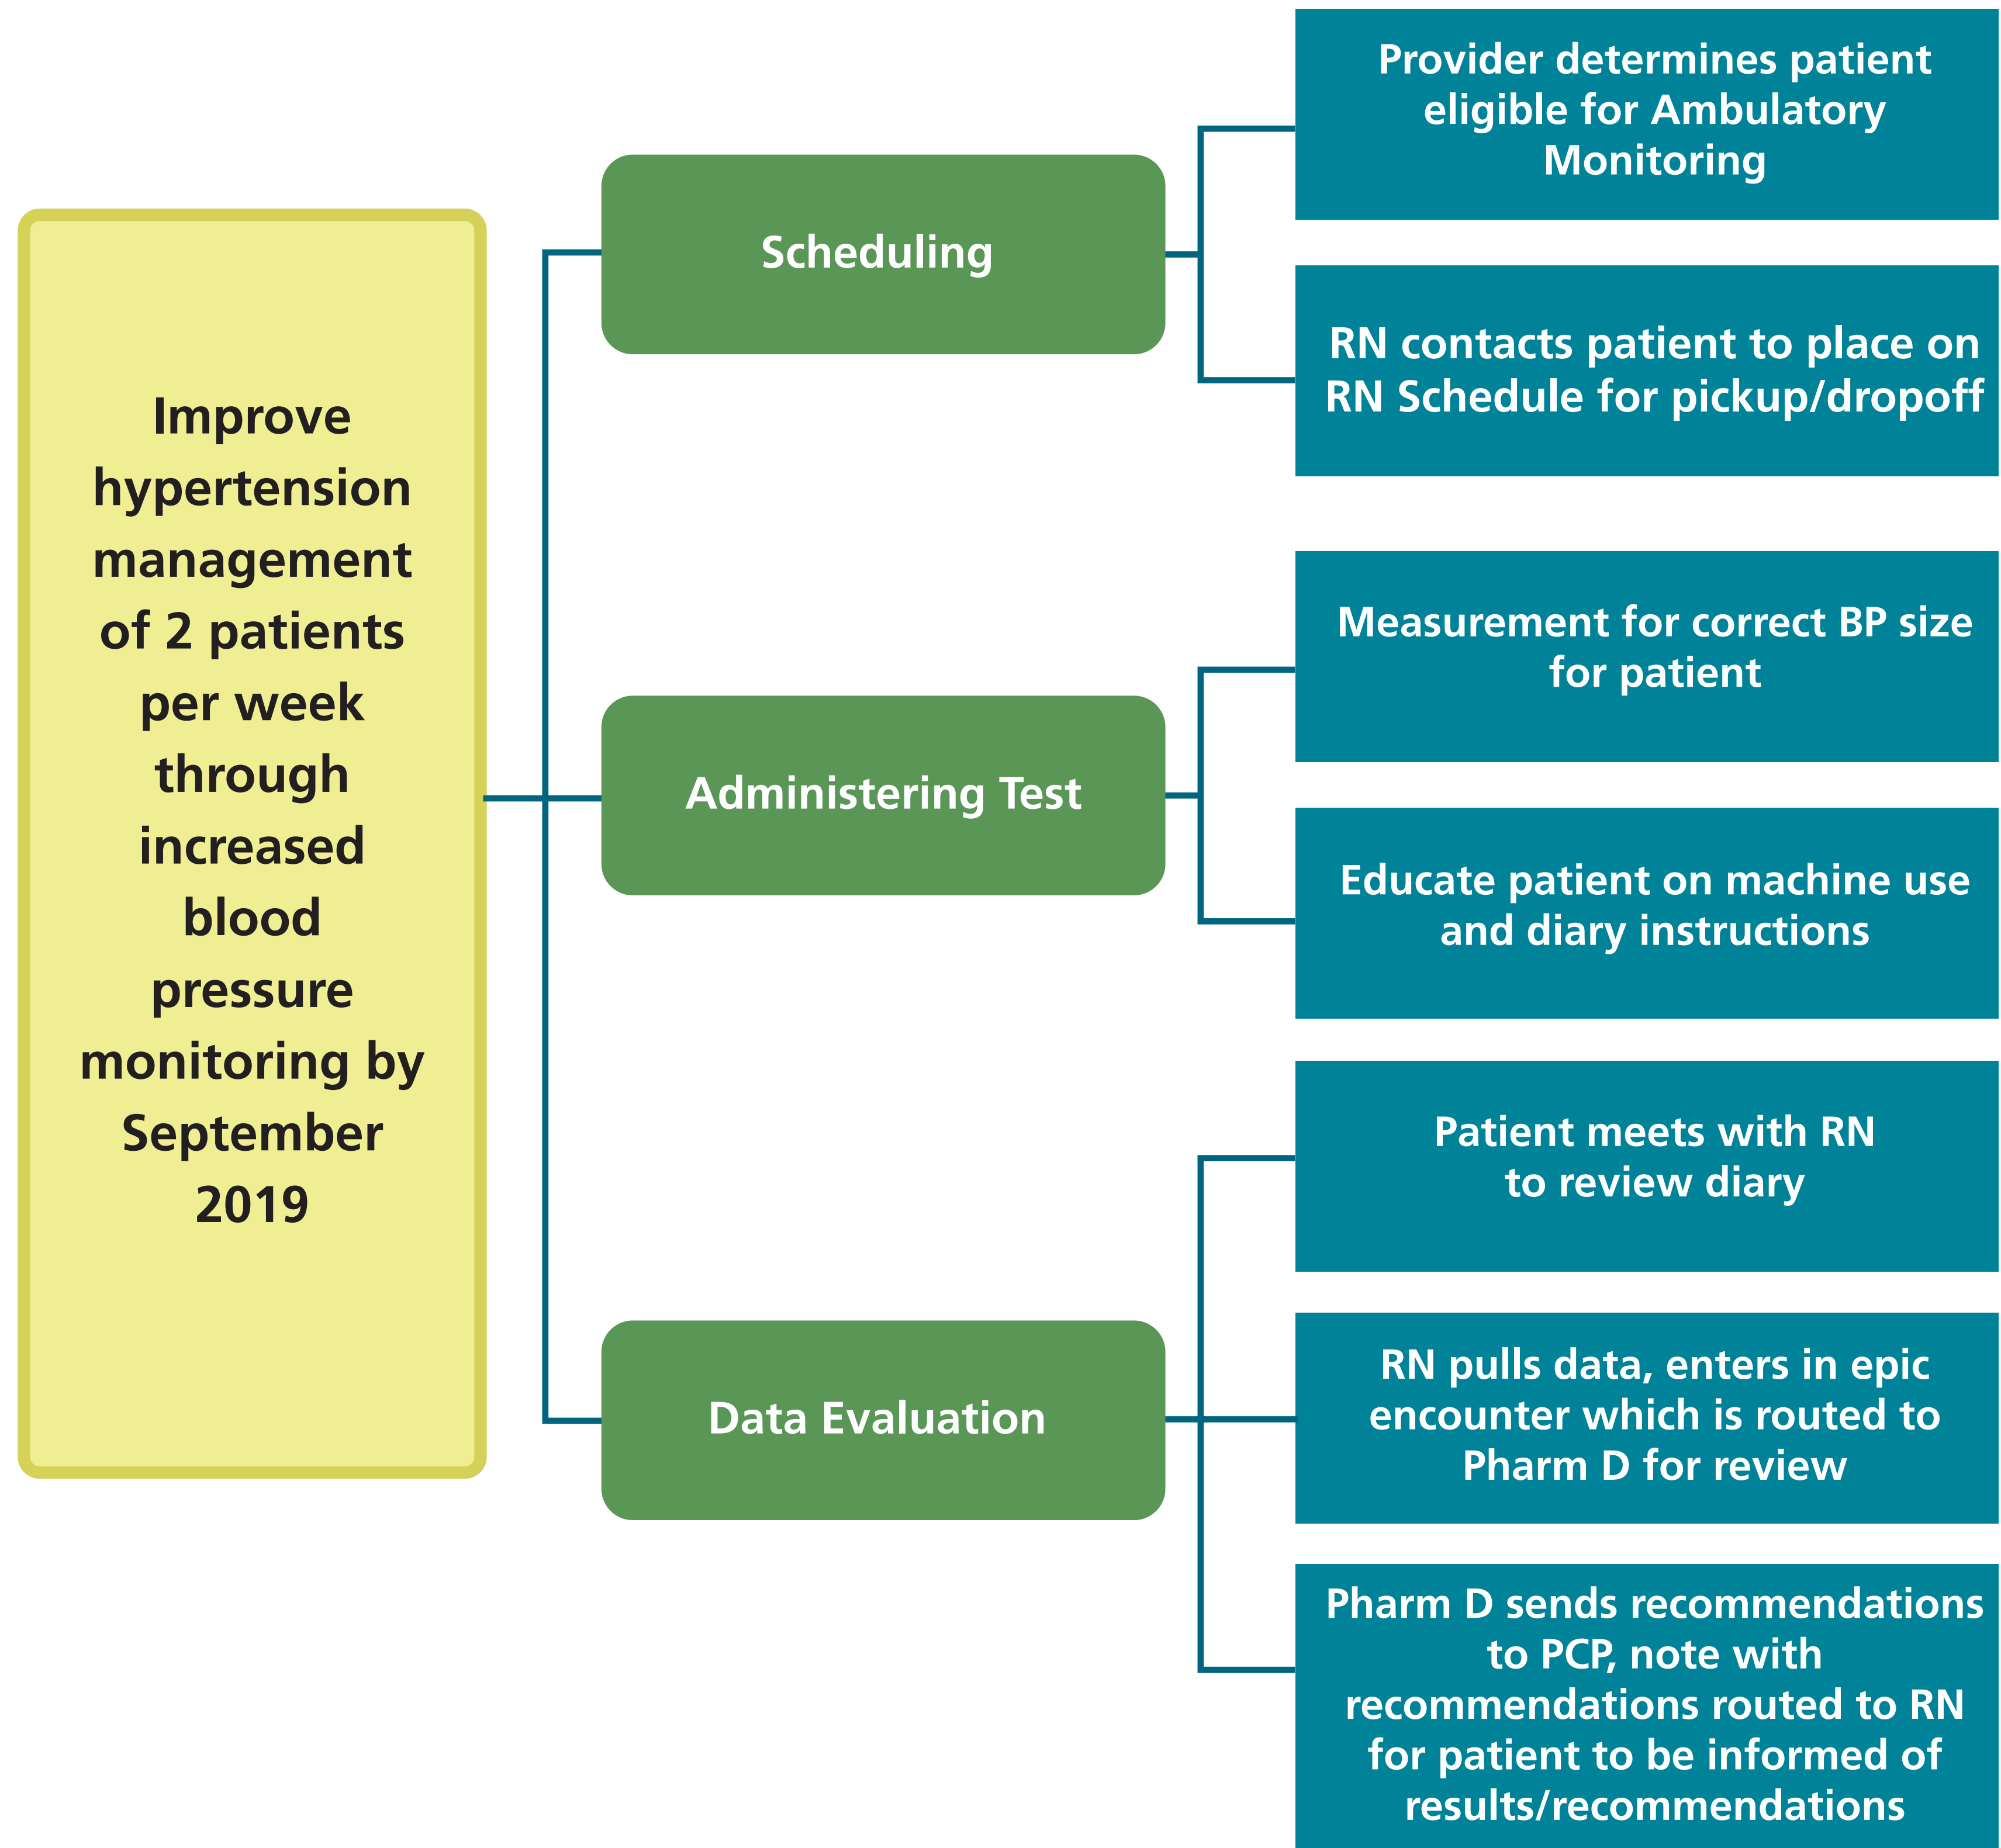

Offering 24 hour ambulatory monitoring for patients reporting white coat hypertension or labile blood pressures in clinic

2020 CPC Measures include data collected in this way.

Why does it matter?

Improving the accuracy of the data we provide physicians helps them to make the best treatment plans for our patients.

Ambulatory Blood Pressure Monitoring

Conclusions

Averaging 4 Patients per week utilizing ambulatory Monitor. Clinic CPC metric for patients with Hypertension in good control has increased by 6% after initiating Ambulatory monitoring and a weekly hypertension clinic, and improved repeat BP checks in clinic.

Acknowledgments

Candice Eide, RN
Amanda Matthews, RN
Barb Pinson, RN
Jayme Johnston, PharmD
